About me

I am a young programmer who creates websites, I started my career as a Front-end developer and then I moved to a Back-end developer. I have worked on various projects and have been awarded maximum points for my work. so far I have worked with programming languages such as (HTML, CSS, JS, PHP, MYSQL, MSSQL, Wordpress) now I have started to learn React JS, because I like to learn new things in the fields of programming related to web applications.

Education

High school

Technic high school "Mehmet Isai"
Gjilan

I graduated high school in Electrical Engineering, Profile: Computer Science

Bachelor

UBT - Higher Education Institution
Prishtine

Now I am studying at the UBT College at the Bachelor's level, majoring in Computer Science and Engineering.

Experience

My work

UCX
Prishtine

I have worked at UCX in the role of Junior Web Designer. Where I have created designs for different websites and then implemented them, mainly for the implementation of the pages we have used elementor which is a wordpress plugin.
